

THE JOURNAL OF PHYSIOLOGY

AUTHOR INDEX to Volumes 1 to 60

Issued by the Physiological Society
and published as a Supplement to
The Journal of Physiology, June 1928

CAMBRIDGE UNIVERSITY PRESS

LONDON FETTER LANE, EC 4

1928

PRINTED IN GREAT BRITAIN

PREFACE

THIS Author Index to Volumes 1 to 60 of the *Journal of Physiology* covers the period of private ownership of the Journal and of the editorships of Sir Michael Foster and Professor J N Langley. It deals with the same period of British Physiology as Sir Edward Sharpey Schafer's *History of the Physiological Society* 1876-1926.

For historical purposes, and for convenience in use, all the papers written by an author whether alone or in collaboration are given under his name in chronological order. A paper by more than one author appears under *each* of its authors, with its full title and reference, and the original sequence of the authors' names is preserved in order, however, to avoid the repetition of the marginal name, the sequence is indicated by the positions of the comma, the dash and the word "and."

The Index has, so far as possible, dealt with changes of name by use of cross references. In the case of women it has followed the usual custom of including a first or Christian name in full.

Papers in the *Proceedings of the Physiological Society* can be recognised by the fact that their page reference is given in Roman numerals.

PRINTED IN GREAT BRITAIN

INDEX OF AUTHORS

ADAIR, G S	On the relation of K in Hill's equation to the carbonic acid pressure in the blood	55, XXI 1921
"	<i>Barcroft J and Boek, A V</i> The identity of hæmoglobin in human beings	55, 332, 1921
,	Thermodynamical proof of the reciprocal relationship of oxygen and carbon dioxide in blood	58, IX, 1923
"	Solubility of oxyhæmoglobin in the red corpuscle	58, XXXV 1924.
"	Comparison of osmotic pressures of oxy hæmoglobin, reduced hæmoglobin and methæmoglobin	58 XXXIX 1924
,	The equilibrium of oxygen and hæmoglobin	60, VI 1925
ADAMI J G	On the nature of glomerular activity in the kidney	6 382, 1885.
ADAMS D K.	<i>and Morris N</i> Anoxæmia and the administration of oxygen	54 CII 1921
,	<i>and Morris N</i> Anoxæmia and the administration of oxygen	54, CVI, 1921.
,	<i>and Morris N</i> Anoxæmia and the administration of oxygen	54 CVII 1921
ADOLPH, E. F	The liberation of CO_2 from carbonate by blood and serum	54, XXXIV 1920.
"	The regulation of the water content of the human organism	54 CXXIII, 1921.
"	The regulation of the water content of the human organism	55 114 1921
ADRIAN E. D	<i>and Lucas, Keith</i> On the summation of propagated disturbances in nerve and muscle	44 68 1912
"	On the conduction of subnormal disturbances in normal nerve	45 389 1912
"	Wedensky inhibition in relation to the all-or none principle in nerve	46, 384 1913
,	The all-or none principle in nerve	47 400, 1914.
"	The relation between the size of the propagated disturbance and the rate of conduction in nerve	48, 53 1914.
	The temperature coefficient of the refractory period in nerve	48 453, 1914.

- ADRIAN, E D The recovery of conductivity of excitability in nerve 50, 345, 1916
- " The response of human sensory nerves to currents of short duration 53, 70, 1919
- " A rotating contact breaker designed by Keith Lucas 54, xxvi, 1920
- " The recovery process of excitable tissues Pt I 54, 1, 1920
- " The recovery process of excitable tissues Pt II 55, 193, 1921
- " and Owen, D R The electric response of denervated muscle 55, 326, 1921
- " and Forbes, A The all or nothing response of sensory nerve fibres 56, 301, 1922
- " and Olmsted, J M D The refractory phase in a reflex arc 56, 426, 1922
- " The time relations of the isometric twitch 57, xi, 1922
- " and Watts, C F A needle thermojunction 58, xi, 1923
- " Cooper, Sybil and The frequency of discharge from the spinal cord in the frog 58, 209, 1923
- " A class experiment on the nature of the injury current 59, i, 1924
- " Cooper, Sybil and The maximum frequency of reflex response in the spinal cat 59, 61, 1924
- " The chronaxie of frog's ventricular muscle 59, lxii, 1924.
- " and Cooper, Sybil Action currents in sensory nerve fibres 60, xlii, 1925
- " The spread of activity in the tenuissimus muscle of the cat and in other complex muscles 60, 301, 1925
- ARKIN, W A Phonology of the vowel sounds 29, i, 1902
- " The regulation of expiratory force during phonation 39, vii, 1909
- ATCHISON, R S Paton, D N, Dunlop, J C and Contributions to the study of the metabolism of phosphorus in the animal body 25, 212, 1900
- ATKIN, R S and Priestley, J G Effects of pituitrin in man 60, xlii, 1925
- ALCOCK, N H The action of anaesthetics on mammalian nerve 28, xliii, 1902
- " The rapidity of the nervous impulse in tall and short individuals 30, xxv, 1903
- " On mammalian non medullated nerve 30, xxxv, 1903
- " and Secmann, J On the negative variation in the pulmonary fibres of the vagus 32, xxx, 1905

ALCOCK, N H	The action of anæsthetics on the injury current of nerves	33 xxvii, 1905
,	and Lynch G R On the relation between the physical chemical, and electrical properties of the nerves. Pt I	36, 93, 1907
"	and Blumfeld J Anæsthesia with known percentages of chloroform vapour	37, lxiv, 1908
,	and Lynch G R On the relation between the physical, chemical and electrical properties of the nerves. Pt. III. Total ash, sulphates phosphates	39, 402, 1910
	and Lynch G R On the relation between the physical, chemical and electrical properties of the nerves. Pt. IV Potassium chlorate and potassium chloride	42, 107 1911
ALLEN, F J	The causation of muscle sounds	22, xxxi 1898
	Irregular astigmatism	27, ii, 1901
ALLEN, R W	and French H Some observations upon the test for choline in human blood	30 xxix, 1903
	Choline—a new method of testing for its presence in the blood and cerebro spinal fluid	31 lvi, 1904.
,	Pembrey M S and. Observations upon Cheyne Stokes respiration	32, xviii 1905
AMERMAN, G L.	Chittenden R H and A comparison of artificial and natural gastric digestion together with a study of the diffusibility of proteoses and peptone	14, 483 1893
ANDERSON, H. K.	Langley J N and Dilatation of the pupil	13, xviii 1892.
,	Langley J N and The action of nicotine on the ciliary ganglion and on the endings of the third cranial nerve	13, 460 1892
	Langley J N and On the mechanism of the movements of the iris	13 554 1892.
	Kantack A A and The action of the epiglottis during deglutition	14 154 1893.
,	Langley J N and. The reflex action of the inferior mesenteric ganglion	15 xi 1893.
,	Langley J N and. The reflex action from sympathetic ganglia	16, 410 1894.
	Langley J N and. Degeneration resulting from section of nerve roots and injury to the spinal cord	16 xii, 1894.
	Langley J N and. The constituents of the hypogastric nerves	17 177, 1894.

ANDERSON, H K.	<i>Langley, J N and</i> On the innervation of the pelvic and adjoining viscera Pt. I The lower portion of the intestine	18, 67, 1895
"	<i>Langley, J N and</i> On the innervation of the pelvic and adjoining viscera Pt. II The bladder	19, 71, 1895
"	<i>Langley, J N and.</i> On the innervation of the pelvic and adjoining viscera. Pt III The external generative organs	19, 85, 1895
"	<i>Langley, J N and</i> On the innervation of the pelvic and adjoining viscera Pt IV The internal generative organs	19, 122, 1895
"	<i>Langley, J N and</i> On the innervation of the pelvic and adjoining viscera. Pt V Position of the nerve cells on the course of the efferent nerve fibres	19, 131, 1895
"	<i>Langley, J N and</i> On the innervation of the pelvic and adjoining viscera. Pt VI Histological and physiological observations upon the effects of section of the sacral nerves	19, 372, 1896
"	<i>Langley, J N and</i> On the innervation of the pelvic and adjoining viscera Pt VII Anatomical observations	20, 372, 1896
"	<i>Langley, J N and</i> Modifications of Marchi's method of staining degenerating fibres	24, xxxi, 1899.
"	Effect on the pupil of excision of the ciliary ganglion	28, xv, 1902
"	The nature of the lesions which hinder the development of nerve cells and their processes	28, 499, 1902
"	<i>Langley, J N and</i> Observations on the regeneration of nerve fibres	29, iii, 1902
"	Reflex pupil dilatation by way of the cervical sympathetic nerve	30, 15, 1903
"	The paralysis of involuntary muscle, with special reference to the occurrence of paradoxical contraction Pt I Paradoxical pupil dilatation and other ocular phenomena caused by lesions of the cervical sympathetic tract	30, 290, 1903.
"	<i>Langley, J N and</i> On the union of the fifth cervical nerve with the superior cervical ganglion	30, 439, 1904.
"	<i>Langley, J N and</i> The union of different kinds of nerve fibres	31, 365, 1904.
"	<i>Langley, J N and</i> On autogenetic regeneration in the nerves of the limbs	31, 418, 1904
"	The removal of the stellate ganglia	31, xxi, 1904.

ANDERSON, H. K	The notion of eserine and atropine upon the denervated sphincter iridis	31, xxii, 1904
"	On the action of drugs on the paralysed iris	32 XLIX, 1905
"	The paralysis of involuntary muscle Pt. II On the paralysis of the sphincter of the pupil with special reference to paradoxical constriction and the functions of the ciliary ganglion	33 156 1905
"	The paralysis of involuntary muscle Pt. III On the action of pilocarpine, physostigmine, and atropine upon the paralysed iris	33, 414 1905
ANDREWS, S	, Beattie, Florence and Milroy T H The acid base equilibrium in muscle	59 XIII 1924.
ANDRUS, E C	Drury A N and The influence of hydrogen ion concentration upon conduction in the mammalian auricle	59, xli 1924
"	The effect of certain changes in the perfusate upon the isolated auricles of the rabbit	59 361 1924
ANREP G	On the part played by the suprarenals in the normal vascular reactions of the body	45, 307 1912.
"	On local reactions and their interpretation	45 318 1912.
"	The influence of the vagus on pancreatic secretion	49 1 1914.
"	The influence of the vagus on pancreatic secretion	50 421 1916
"	Pitch discrimination in the dog and Evans C L The mode of action of vaso-dilator nerves	53, 307 1920
"	The metabolism of the salivary glands. I. The relation of the chorda tympani to the nitrogen metabolism of the submaxillary gland	54 x 1920
"	and Drummond J C Note on the supposed identity of the water soluble vitamin B and secretin	54 319 1921
"	and Daly I de B Electrical variation of the pancreas	54 349, 1921
"	and Cannon R K The metabolism of the salivary glands. II The blood sugar metabolism of the submaxillary gland	55, II 1921
"	Observations on augmented salivary secretion	58 248, 1922
"		56, 203 1922.

- ANREP, G *and Cannan, R K* The metabolism of the salivary glands III The blood sugar metabolism of the submaxillary gland 57, 1, 1922
- " The metabolism of the salivary glands IV The metabolism of the reducing substance of the submaxillary gland 57, 7, 1922
- " *and Cannan, R K* The concentration of lactic acid in the blood in experimental alkalæmia and acidæmia 58, 244, 1923
- " *and Khan, H N* The metabolism of the salivary glands V The process of reconstruction of the submaxillary gland 58, 302, 1924
- " , *Lush, Joan L and Palmer, M Grace* Observations on pancreatic secretion 59, 434, 1925
- " *and Bulatao, E* Observations on the pulmonary circulation. Pulmonary circulation in the heart-lung preparation 60, 175, 1925
- ANSON, M L , *Barcroft, J, Barcroft, H, Mirsky, A E, Oinuma, S and Stockman, C F* The relation between the spectrum of, and the affinity of certain gases for, vertebrate hæmoglobin 58, ~~xxx~~, 1924
- " *and Mirsky, A E* The CO dissociation curve of hæmochromogen 59, ~~xiii~~, 1924
- " *and Mirsky, A E* On hæmochromogen and the relation of protein to the properties of the hæmoglobin molecule 60, 50, 1925
- " *and Mirsky, A E* On the combination of nitric oxide with hæmoglobin 60, 100, 1925
- " *and Mirsky, A E* On hæm in nature 60, 161, 1925
- " *and Mirsky, A E* On heliocorubin and its relation to hæmoglobin 60, 221, 1925
- ARMSTRONG, E F *and Courtauld, S L* The formation of isodynamic glucosides with reference to the theory of isometric change, and the selective action of enzymes preparation of β methyl glucoside 33, iv, 1905
- " The rapid detection of emulsin 40, ~~xxxii~~, 1910
- ASH, D H *Hill, L and* Metabolism and cooling power 52, ~~lxix~~, 1919
- " *Hill, L and* The efficacy of thoroughly drying clothes 53, ~~lxxi~~, 1919
- " *Hill, L and* An electrically heated kata thermometer 54, ~~xlv~~, 1920
- " *Campbell, J A, — and Hill, L* The effect of cooling power of the atmosphere on body metabolism 55, 259, 1921

ATKINSON, MILDRED	The histological structure of the moderator band of the sheep <i>, Clark G A and Menzies J A</i> The function of the urinary tubules in the frog	52 III 1917 55, 253, 1921
AUDOVA, A.	<i>Lipschütz, A and.</i> The comparative atrophy of the skeletal muscle after cutting the nerve and after cutting the tendon	55, 300, 1921
AVELING, FLORENCE,	<i>McDouall R J S and Wells H M</i> On the physiology of the so-called psycho galvanic reflex <i>and McDouall, R J S</i> The effect of the circulation on the electrical resistance of the skin	60, VII, 1925 60, 316, 1925
AYRES, W C	<i>Kühne W and</i> On the stable colours of the retina	1 109 1878
BABKIN B P	<i>and Sinelnikov E I</i> Isolation of different parts of the digestive tract as a method of studying its movements	58 15 1923
"	The influence of the blood supply on pancreatic secretion	59 153 1924
"	Reflex hyperglycæmia	59 LXVI, 1924
BAIN W	<i>and Edgcombe W</i> The physiological action of certain mineral waters and baths on the blood and on the excretion of urea and uric acid with a note on the quantitative relationship between uric acid and leucocytes <i>Edgcombe W and</i> An abstract of observations on the effect of baths massage and exercise on the blood pressure The rôle of the liver and spleen in the destruction of the blood corpuscles	23 499 1899 24, 48 1899 29, 352 1903
BAINBRIDGE F A.	The lymph flow from the submaxillary gland	25 XVI 1900
"	Observations on the lymph flow from the submaxillary gland of the dog	28 79, 1900
"	On the formation of lymph by the liver	28 204 1902
"	On the adaptation of the pancreas	31 98 1904

THE JOURNAL OF PHYSIOLOGY

SUBJECT INDEX to Volumes 1 to 60

Issued by the Physiological Society
and published as a Supplement to
The Journal of Physiology Jan. 1931

CAMBRIDGE UNIVERSITY PRESS
LONDON FETTER LANE, E.C. 4
1931

INTRODUCTION TO SUBJECT INDEX

THE late Sir Michael Foster published in 1873 the first of three volumes of papers from the Physiological Laboratory of Cambridge University which stand in ancestral relation to the *Journal of Physiology*. In the introductory letter prefacing this volume he stated that he had hesitated to publish these papers but had recalled the advice of Horace "Sapere aude, incipe" and further on he asked the Master and Fellows of Trinity College, whose Praelector he was, to regard the pages as the first, cotyledonary, leaves which may assure them that the seed they have sown has germinated, but which can tell little what kind of plant it will grow to or what manner of fruit it will bear."

Had Sir Michael Foster been able to foresee the immense development of the study of Physiology that we, in our generation, can appreciate he might well have exclaimed with the prophet "Germians germinabit et exultabit lætabunda."

Of this development no insignificant part is represented by papers appearing in the first sixty volumes of the *Journal of Physiology*, and it is therefore very appropriate that following on the publication of the Author Index, the Editorial Committee decided that it was desirable that a subject index to these volumes should be prepared.

The late Prof Langley had already issued a subject index to the first 25 volumes but on consideration it seemed advisable not to attempt a continuation of this index but to prepare an entirely new one for the whole sixty volumes. In doing this Prof Langley's method of classification under systems has not been adopted, but a simple alphabetical order has been followed.

The following principles have been adopted

(1) The reference is in each case to the first page of the paper in which the subject is mentioned. In some cases this system is clearly inconvenient, but these cases are not numerous and it seemed to be preferable on the whole, to refer to the first page of a paper rather than give the exact page reference.

(2) The attempt has been made, where a subject can be considered from more than one point of view, to give entries referring to each of them, e.g. lactic acid production in muscular contraction is entered under lactic acid and also under muscle.

(3) References to volumes are printed in clarendon type, thus 57
References to pages in ordinary arabic type for papers, thus 79, and re-
ferences to articles in the Proceedings in small roman type, thus XIV
When more than one page reference occurs in one volume the volume
number is not repeated

(4) In cases where two series of Proceedings appear in one volume
the date has been added to the page reference

The preparation of this subject index has been very greatly facilitated
by the generous co-operation of authors and I wish to express to them my
thanks for the ungrudging assistance they have given Had it not been for
this help the publication of the index would, at the least, have been very
much delayed

While the completion of the index is mainly due to the help given by
authors and to the untiring and efficient labours of Mrs Melville, to whom
my sincere thanks are due, I have not hesitated to modify or reject any
entries suggested I am therefore wholly responsible for such mistakes
and shortcomings as may be discovered by those who use the index

J G PRIESTLEY
